Camber Mental Health

Our Kansas treatment centers are licensed in the state of Kansas and accredited by The Joint Commission.

Helping youth achieve
mental health wellness.

Camber[®]
Mental Health
KVC HEALTH SYSTEMS

We all need connection.

Why Camber Mental Health?

Our experienced, medical and behavioral health professionals provide a nurturing and therapeutic experience, along with a treatment plan tailored to meet each individual's unique needs. Each Camber treatment center is designed to meet the unique needs of people. Our facilities encourage positive interactions and personal growth, helping youth reach their full potential during treatment and beyond.

Building Healthier Communities

At Camber, we help youth achieve mental wellness so they can reach their potential, build resilience and thrive in their communities. Through our mental health hospitals and residential treatment programs serving Kansas, Missouri and multiple regions across the Midwest, we provide expert and compassionate care to thousands of children each year who are struggling with depression, anxiety, suicidal thoughts, the impacts of trauma and other behavioral and mental health needs.

We use neuroscience-based treatment resources regarding how stress and trauma impact brain development and translate this science into innovative, hands-on tools that guide successful treatment outcomes. Our goal is for each individual to safely return home with the resources and support in place to live a healthy and fulfilling life in their community.

Services

- Inpatient Mental Health Treatment
- Residential Mental Health Treatment
- Alternative Education Programs

“Staff did an amazing job taking care of my son. I got daily phone calls from the therapist and could call the nurses to see how his day was. Everyone I talked with was caring and empathetic. My 13-year-old son even said it was helpful for him to be there.”

— Guardian of former patient

Our Treatment Team

Camber recruits the very best healthcare professionals. All employees receive extensive training with a focus on trauma-informed care built into our daily practice and interactions for proven outcomes.

Our multi-disciplinary team includes:

- Psychiatrists & psychologists
- Medical physicians
- Registered & advanced practice nurses
- Licensed master-level therapists
- Certified teachers
- Dietitian
- And more

Family Involvement

Our patient-centered approach encourages the involvement of family and close supporters throughout the treatment process. We believe family members play a significant role in treatment planning and can best support recovery by actively participating in therapy and discharge planning.
